

Every Myers call, answered. *In English, et en français.*

A 60-day paid pilot of Sophie, a bilingual AI phone assistant, at two Myers dealerships. Plus what we found across your websites, and how we can support the group beyond the pilot.

PREPARED FOR

Myers Automotive Group, Ottawa

PREPARED BY

GEN:A Labs · Ottawa

PILOT

2 dealerships · 60 days

AT A GLANCE

Start small, measure honestly, then decide.

Sophie answers the calls your team can't get to: after hours, and calls that ring busy or go unanswered during the day. She captures what the caller needs and passes it to the right store with a complete summary. During business hours she can transfer callers to staff.

THE PILOT

Paid pilot

2 DEALERSHIPS · 60 DAYS

Credited in full against setup if Myers continues. If the agreed targets are not met, Myers can stop with no further obligation.

- English and French, in whichever language the caller starts
- Your phone numbers, Xtime and call tracking stay as they are
- Every call logged with a clear outcome, reported weekly
- Results measured against a baseline from Myers' own call data

What we are not promising yet: confirmed bookings directly in your scheduler. That depends on scheduler and DMS access, which we will request during discovery. Until that access is live, Sophie captures **booking requests** that your staff confirm.

IN THIS DOCUMENT

01 What we found on your websites
02 Where the opportunity is
03 How Sophie fits your systems
04 The pilot, in detail
05 How we measure, and the timeline
06 Plans after the pilot
07 More we can do, and AI training
08 Why now, and what else we do

Strong tools, a fragmented picture, and silent phones.

In October 2026 we opened three Myers websites in a browser and checked which tools each one loads. Your stack uses well-known industry products. The gap is that every store uses something different, and none of it touches the phones.

Myers group site
myers.ca

Web chat	GUBAGOO · AI-ASSISTED
AI on phones	NOT SEEN
French option	NONE
Click-to-call	NO NUMBER ON HOMEPAGE
Tire booking	CONTACT FORM

Myers Barrhaven Toyota
myersbarrhaventoyota.ca

Web chat	IMPEL · CHAT AI
AI on phones	NOT SEEN
French option	NONE
Click-to-call	YES
Service booking	XTIME

Myers Orléans GM
myersorleansgm.ca

Web chat	NONE LOADED
AI on phones	NOT SEEN
French option	NONE
Click-to-call	YES
Page title	TYPO IN GOOGLE TITLE

3 of 3 sites

with no French language option, in a bilingual city.

3 chat setups

on three sites: Gubagoo, Impel, and none. Customer data ends up in different places.

0 AI on phones

Call tracking measures calls on all three sites, but nothing answers them with AI.

YOUR DATA WILL TELL

Questions we would like to answer together.

The sites can't show these. Your phone system and call-tracking reports can.

PHONES	How many calls are missed per day in tire season? Do calls go to a central team, or does each store answer its own?
LANGUAGE	What share of your callers speak French?
SYSTEMS	Is Reynolds your DMS, and does every store book through Xtime?
CONTRACTS	When do the Gubagoo and Impel contracts end, and are any of their phone products in use?

The biggest wins are on the phones and in tire booking.

There is no need to rebuild the sites. Convertus, Xtime and call tracking work; we build on top of them without touching them.

Your current stack, as the sites show it

WEBSITE PLATFORM Convertus	SERVICE BOOKING Xtime	DMS (LIKELY) Reynolds & Reynolds
WEB CHAT Gubagoo · Impel	CALL TRACKING ReachLocal + another service	TRADE-IN / BUYING AutoVerify · Motocommerce
TAGS & ANALYTICS Google Tag Manager	OEM PROGRAMS Shift Digital	PHONE ANSWERING Nothing in place

The DMS is inferred: the Xtime booking screen loads from a Reynolds server. We did not test the chat tools live, so we make no claim about their answer quality. Impel and Gubagoo also sell phone products that may be in use somewhere not visible on the sites; we will ask.

Small things we noticed

TIRE SEASON	In late October, the large banner on the group homepage was a job posting rather than the tire campaign.
BOOKING	On the group site, a tire change starts with a contact form and a wait for someone to get back to the customer.
PHONE	The group homepage has no clickable phone number. The dealership sites do.
CONSISTENCY	The number of locations is stated differently in different places on myers.ca, and the Orléans GM page title shown by Google contains a typo.

Add, change, fix: in order of impact.

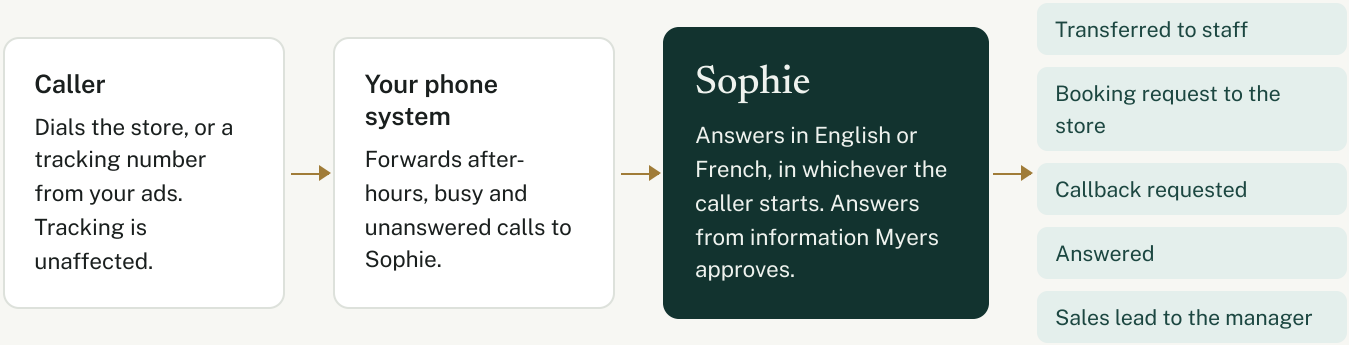

Most of the value sits with the phones and tire booking. A few quick website changes are for your own team or web agency, and we are happy to brief them.

RECOMMENDATION	WHAT IT MEANS	OUR VIEW OF IMPACT	WHO DOES IT
Bilingual phone assistant	Sophie answers dealership numbers, captures requests, transfers to staff	▬▬▬▬	GEN:A Labs
Real-time tire booking	Find the storage record, offer a time, confirm by SMS, instead of a form	▬▬▬▬	GEN:A Labs + Xtime access
French	The assistant in French now; at least the main web pages later	▬▬▬	GEN:A Labs (assistant), your web agency (site)
One assistant across channels	The same bilingual assistant on phone and web, connected to the same systems	▬▬▬	GEN:A Labs, once current chat contracts end
"Talk to Sophie" on the sites	One Google Tag Manager tag adds the button across all sites, alongside existing chat	▬▬	GEN:A Labs
Seasonal homepage banner	Lead with the tire campaign in October–November and March–April	▬▬	Myers marketing
Clickable phone number	A phone number in the top menu of the group site	▬▬	Your web agency
Quick fixes	Location count, Orléans GM page title	▬	Your web agency

We do not recommend replacing your existing chat in the first phase: those tools are under contract, and proving value on the phones comes first.

Behind your existing lines, never in the way.

Every dealership keeps its number. Your phone system forwards the covered calls to Sophie, and she hands calls back to your staff whenever a person is needed. If Sophie is unavailable, calls fall back to your existing line or voicemail.

PHASE ONE

Phones

A forwarding rule in your phone system: either all calls, or only busy, unanswered and after-hours calls. When Sophie can't resolve a call, she transfers it to the right extension, and a call summary reaches the staff member by SMS or email.

SYSTEMS

Connections, once access is granted

Booking: Xtime, through Cox Automotive's partner program. **Customer and tire storage records:** your DMS (likely Reynolds), through its certification program; usually the slowest step. **Sales leads:** into your CRM. **Until then:** booking requests are emailed to the store, so no call is lost.

PHASE TWO

Websites

One Google Tag Manager tag adds a "Talk to Sophie" button across your sites, alongside the existing chat. Once those contracts end, we recommend one bilingual assistant for every channel, with the same knowledge and the same systems behind it.

DATA

Privacy by design

Each call opens with a recording notice. Before go-live you receive a data-flow summary: what is stored, by which provider, in which country, and for how long. Where processing takes place outside Canada, it is covered by contractual protections as required under PIPEDA. Retention, access, deletion and incident notification are agreed in writing before go-live.

Where the call goes once Sophie hangs up.

One sample after-hours call during the pilot, step by step: what Sophie records, where it lands, and how your staff are told.

01 **Call ends · Sun 21:14**

A French-speaking caller asks for a winter tire changeover. Tires are in storage, 2021 RAV4, Thursday morning preferred. Sophie says the service team will call back by 10:00 the next business day, the standard Myers sets.

02 **Record created**

Customer, callback number, language, store, vehicle, service, preferred time, follow-up deadline. Status: `BOOKING REQUEST RECEIVED`

03 **Store notified**

Email to the store's service inbox right away, with summary, transcript (with English translation) and recording. SMS to the advisor on duty at opening.

04 **Staff confirm · Mon 09:12**

The advisor calls back, books in Xtime as usual, and marks the request confirmed. Status: `BOOKING CONFIRMED BY STAFF`

05 **Logged and reported**

Every call keeps one outcome. Open follow-ups stay on the next-morning list until someone closes them, and appear in the weekly report.

Once Xtime access is live, Sophie books the slot during the call, the record shows **Booking confirmed** only after Xtime returns the appointment, the customer gets an SMS confirmation, and staff receive an FYI instead of a task.

EMAIL · SERVICE DESK — SUN 21:15

To: **Barrhaven service inbox** (set by Myers)
Subject: **[Booking request] Winter tires · RAV4 · Thu AM · FR**

New booking request from an after-hours call. Not yet in Xtime: please confirm a time with the customer by Mon 10:00.

Mark as confirmed | Listen to call

SMS · ADVISOR ON DUTY — MON 07:30

Sophie: 1 new booking request for Barrhaven (winter tires, Thu AM, French speaker). Call back by 10:00. Details in your inbox.

SMS · CUSTOMER (ONLY IF MYERS APPROVES) — SUN 21:15

Myers Barrhaven Toyota : nous avons bien reçu votre demande pour vos pneus d'hiver. Notre équipe vous rappellera demain avant 10 h.

CALL LOG · BARRHAVEN — WEEKLY REPORT

Sun 21:14	Winter tires · RAV4 · FR	CONFIRMED
Sun 19:52	Hours question · EN	ANSWERED
Sun 18:03	Lease return · EN	CALLBACK

Illustrative sequence with sample data. Recipients, timing and message templates are agreed with Myers before go-live.

What is delivered, and when.

	PILOT · 2 DEALERSHIPS	AFTER THE PILOT, ONCE ACCESS IS GRANTED	NOT IN THIS PROPOSAL
Calls covered	After-hours calls, plus busy and unanswered calls forwarded by your phone system	Same rules, or all calls, per dealership	Outbound campaigns
Language	English and French, in whichever the caller starts	Same	
Answers	Hours, locations, services, tire storage terms, from information Myers approves	Same, kept up to date per store	
Appointments	**Booking request** captured and sent to the store; staff confirm	**Confirmed booking** in the scheduler (e.g. Xtime)	
SMS	Not sent, unless Myers approves a "we received your request" message	Sent only after the scheduler confirms	Marketing messages
Transfers	Tested transfer to the right department during business hours	Same, all stores	
Tire storage	Only if storage records are accessible during the pilot	From the DMS or storage database	
Sales leads	Captured and emailed to the sales manager	Written to Myers' CRM	
Reporting	Weekly: every call, its outcome, open follow-ups	Same, by store and department	

Every call gets one honest outcome

Sophie never tells a caller an appointment is booked unless it is confirmed. Callback times are quoted only from a standard Myers sets for each store.

Booking request received
Customer, vehicle, service and preferred time captured. A staff member confirms.

Booking confirmed
Your scheduler returned a confirmed appointment. Once access is live.

Transferred
Handed to a staff member, who picked up.

Callback requested
On the next-morning call-back list.

Answered
Resolved without staff involvement.

Not resolved
Caller hung up or Sophie could not help. Reviewed weekly.

Which stores: before quoting the full group we agree a named list of dealerships, collision centres and phone lines. For the pilot we suggest Myers Barrhaven Toyota and your busiest GM store.

05 · HOW WE MEASURE

Targets agreed with you, against your own baseline.

During the build we take a baseline from your phone system or call-tracking reports for the two pilot stores. English and French results are reported separately and reviewed by a Canadian French speaker.

MEASURE	HOW IT IS MEASURED	PROPOSED TARGET
Covered calls answered	Calls forwarded to Sophie that she answered	98% or more
Correct routing	Transfers and requests reaching the right store and department, on a reviewed sample	90% or more
Complete requests	Booking and callback requests with all required details	90% or more
Follow-up time	Time from request to staff contact, against Myers' own standard	Tracked; target set by Myers
Incorrect promises	Calls where Sophie stated something untrue	None left uncorrected; each reviewed within one business day
Extra work completed	Requests from after-hours and unanswered calls that became completed appointments, checked by Myers	Reported, no target

TIMELINE

Oct 27 – Nov 2	Discovery and pilot agreement · store list, systems, contacts
Nov 3 – Nov 20	Build and baseline · approved scripts, store information, call data
Nov 16 – Nov 20	Testing with Myers staff · English and French test calls, transfer tests
Nov 23 – Jan 21, 2027	**Pilot live, 60 days** · forwarding in place, scripts signed off
Week of Jan 25, 2027	Results review and decision · pilot report
From February 2027	Rollout in waves, aiming to be live before the spring tire changeover · decision, scheduler and DMS access

If forwarding or approvals are ready later than planned, the pilot start moves with them and still runs 60 days.

Three plans, priced per dealership.

Essentials

PER DEALERSHIP, MONTHLY

Greeting, routing and transfers, EN/FR, answers, booking and callback requests, after-hours messages, weekly reports.

RECOMMENDED

Professional

PER DEALERSHIP, MONTHLY

Essentials, plus confirmed bookings in your scheduler, SMS confirmation, tire storage lookup and CRM leads, each once access is live.

Enterprise

PER DEALERSHIP, MONTHLY

Professional, plus outbound reminders and campaigns (subject to DNCL and CASL), a call dashboard and a dedicated success manager.

Investment

We will share pilot and plan pricing in our discovery meeting, once we know your store list, phone setup and systems. The pilot fee is credited in full against setup if Myers continues. Third-party fees, such as scheduler or DMS partner fees, are passed through at cost and agreed in writing first.

How Myers can work out the value

We will not quote a return on investment until we have your numbers. After the pilot, the value per month is:

> (appointments completed through Sophie that would otherwise have been missed) × (Myers' average contribution margin per appointment) + (staff time saved) − (cost of the service)

Myers provides the margin figure; we provide the call outcomes. Appointments that would have come through another channel anyway are not counted.

Support. Sophie answers covered calls 24/7; that is an automated service, not 24/7 human support. Our team: business days 8:00–18:00 Eastern, a named contact and a backup, outages acknowledged within 1 hour in those hours.

From Myers. One pilot owner, plus a contact at each pilot store who receives requests and confirms follow-ups.

07 · BEYOND THE PILOT

More we can build with you.

Separate from the pilot and quoted only when you ask. Each one builds on the same assistant and the same systems, so nothing is wasted.

Real-time tire booking

Replace the group site's contact form with a flow that finds the storage record, offers a time and confirms by SMS.

NEEDS XTIME + DMS ACCESS

"Talk to Sophie" on every site

One Google Tag Manager tag, running alongside your existing chat, with no site rebuild.

PHASE TWO

One assistant, every channel

Consolidate web chat into one bilingual assistant with the same knowledge as the phones, as current chat contracts end.

TIMED TO YOUR CONTRACTS

Reminders and a call dashboard

Outbound service reminders (subject to DNCL and CASL) and a group-wide view of calls by store and department.

ENTERPRISE PLAN

OPTIONAL · IN-HOUSE AI TRAINING

Your people, confident with AI.

If Myers wants it, we run practical sessions for your teams, built around your own stores and tools. Format, length and price are agreed with you.

Service and BDC teams

Working alongside Sophie: hand-offs, call summaries, the call-back list.

Managers

Reading the weekly report, setting standards, spotting what to improve.

Everyday AI

Using AI assistants safely for email, notes and research in daily work.

Data and privacy

What customer data may go into AI tools, and what may not.

08 · WHY NOW, AND WHAT ELSE WE DO

AI is already arriving at your stores. The question is who it works for.

Your vendors are already putting AI in front of your customers: Gubagoo's AI chat on myers.ca, and Impel's on the Toyota site, both arriving through vendor and manufacturer programs. Each one sees a slice of your customers, in its own system.

The phones are where customers still reach you directly, and where the busiest moments of the year, like tire changeover, are decided. An assistant that answers there, in both official languages, and works for the group as a whole, is a step Myers can own.

We stand beside you

We start with two stores, not twenty. We report every call with an honest outcome. We never let Sophie promise what your systems have not confirmed. And we stay with your teams after go-live, with a named contact, weekly reviews and training when you want it.

BEYOND THE PHONES

Everything Myers puts in front of customers, we can build with you.

Sophie is where we start. The same team also produces the marketing, content and tools around her, in English and French. Each one is quoted separately, only when you ask.

Marketing campaigns

Seasonal tire and service campaigns, offers and landing pages.

Social media

Bilingual content calendars, posts and short videos.

Commercial video

Dealership, model and service films, AI-assisted production.

Websites and chat

"Talk to Sophie" on your sites, then one assistant for every channel.

Team AI training

Practical sessions for service, BDC and managers.

Cem Guler · Founder, GEN:A Labs · Ottawa · buildgena.ca

NEXT STEPS

Hear Sophie for yourself, then pick two stores.

Call Sophie in English and in French before you sign anything. If she sounds right, we start discovery this week.

01	A 30-minute discovery call: phone system, scheduler, DMS, CRM, and who can grant access to each
02	The named list of dealerships and phone lines to be covered
03	Choose the 2 pilot dealerships and a pilot owner
04	Call reports for the pilot stores: the last 4 weeks, or the busiest recent tire season
05	Approval of store information and the English and French scripts

LIVE CONCEPT DEMO

jjackguler.github.io/sophie-myers

Access code provided separately. Concept demo: not affiliated with or endorsed by Myers.
